Data Governance Manager (m/f/d)

Vienna | asap | Full-time employee | unbefristet

We are Magenta

Magenta Telekom is a leading provider of internet, mobile communications, entertainment and business solutions in Austria. The company counts around 2,200 employees and is part of the Deutsche Telekom Group.

Your Team

Vision of Data & AI department is to enable every decision within Magenta to be data driven. We aim to be the #1 business partner for all Magenta units, when it comes to data. We are on a mission to simplify our data stack and bring our data, clean and structured to a modern cloud with GCP.

To enable the value of this data we are building a strong data governance foundation with a skilled and dedicated data governance team. To complete this team, we are searching for a Data Quality Manager.

- Architect and implement a scalable data quality framework, including standards, rules, and validation processes.
- Design and deploy technical solutions for implementing key data quality validation metrics, ensuring that business-critical data is accurate, consistent, and reliable.
- Collaborate with engineering, analytics, and governance teams to embed data quality controls into system architecture, metadata management, and master data solutions.
- Promote the data governance initiative and accountability for data ownership, working with business data stewards and stakeholders and clarifying roles and responsibilities.
- Partner with technical teams and business units to identify data issues, prioritize remediation, and embed quality practices into daily operations.

- You have an educational background and experience in Information Management,

Computer Science, or a related field, with hands-on experience in data governance, data management, or business intelligence?

- You bring strong expertise in data governance and data quality, including principles, frameworks, best practices, and practical experience with governance tools (e.g., Collibra, DataHub), as well as organizational compliance requirements and their technical implementation?
- You have an analytical, problem-solving mindset to identify and address root causes of data quality issues, combined with change management skills to help embed a data quality culture across the organization?
- You are technically proficient in SQL for data validation and have experience with data visualization tools (e.g., Tableau) to clearly communicate data quality metrics?
- You are fluent in English and at least average in German?

At Magenta, we believe in diverse employees and live equal opportunities. We welcome all applications regardless of cultural and social background, age, gender, nationality, religion, disability or sexual orientation. Magenta connects all people.
