Lead Developer (f/m/d) - Enterprise Middleware & Core Provisioning

Vienna | asap | fulltime | unlimited

We are Magenta

Magenta Telekom is a leading provider of internet, mobile communications, entertainment and business solutions in Austria. The company counts around 2,200 employees and is part of the Deutsche Telekom Group.

Your team

Our team works according to agile principles, designing, developing, testing, and operating software that connects multiple business domains and manages central resources in a transparent manner. Working closely with our stakeholders and guided by corporate strategy and the roadmap, we continuously deliver state-of-the-art middleware services that are architecture-compliant, secure, and highly available, and we provision both internal IT systems and central platforms in the core network.

As a lead developer, you will take over system responsibility for selected applications, manage agile development from conception to successful deployment, coordinate the development team of external developers, and ensure high software quality as well as current technical standards.

- Own and continuously improve selected applications while driving agile development
- Contribute to solution design, provide development feedback, and break down and estimate requirements
- Translate solution designs into clear work packages, create detailed designs where needed, and ensure effective execution
- Deliver software end-to-end by implementing features, coordinating testing, and managing smooth deployment
- Plan, prioritize, and assign development tasks while managing dependencies and

integrating bug fixes in a DevOps workflow
- Maintain system documentation and ensure alignment with technical architecture and enterprise standards
- Guide and support external developers, ensuring high code quality and adherence to development and review standards
- Monitor industry trends and proactively drive continuous improvement within the team

- Do you have several years of professional experience in software development (e.g., Java), including API development and integration (REST/SOAP)?
- Are you highly experienced with cloud infrastructure technologies such as Kubernetes and OpenShift, and do you have solid skills in software design and testing practices?
- Do you demonstrate strong analytical thinking, work in a structured and organized way, and collaborate effectively within a team?
- Are you driven by a growth mindset and motivated to continuously learn and adopt new technologies?

At Magenta, we believe in diverse employees and live equal opportunities. We welcome all applications regardless of cultural and social background, age, gender, nationality, religion, disability or sexual orientation. Magenta connects all people.

„Kunde ist König" ist unser Versprechen.

Wir wollen gemeinsam gewinnen.

Du kannst dich auf mich verlassen.

Wir dürfen das und machen's einfach.

Kein Bullshit Bingo - wir sagen was Sache ist.

Wir nehmen's mit Humor.

I ❤ Magenta
