Senior IP Network Engineer (f/m/d) - B2B Solutions

Vienna | asap | full-time | unlimited

We are Magenta

Magenta Telekom is a leading provider of internet, mobile communications, entertainment and business solutions in Austria. The company counts around 2,200 employees and is part of the Deutsche Telekom Group.

Your Team

Our team defines the design and development strategy for IP/MPLS/SR core and IP data center networks, with focus on B2B solutions.
We are responsible for developing and evolving a shared IP/MPLS core network that meets the highest standards of availability, service quality, and performance. Our mission is to provide a robust and scalable network foundation that enables the successful delivery of new services, platforms, and products across both fixed-line and mobile networks. Working closely with national and international engineering teams, management, and technology vendors, we drive innovation by aligning our network architecture with emerging technological trends and business requirements.

- Design and evolve IP/MPLS network architectures, including IP Core, IP Access, IP Datacenter, Mobile Backhaul, B2B SD-WAN, and network automation platforms
- Evaluate and integrate new technologies, platforms, hardware, software, and vendor solutions, including laboratory validation, technical specifications, and vendor selection
- Develop and maintain network architecture, design standards, configuration guidelines, and implementation documentation (HLD, LLD, Implementation Guides), while ensuring scalability, performance, and capacity planning
- Manage the complete platform lifecycle from introduction through operation to retirement, while defining the long-term technology roadmap
- Deliver B2B networking solutions with a focus on SD-WAN (Fortinet, Versa),

including feasibility studies and impact assessments for new services and customer projects
- Advance network automation and AI-driven capabilities to improve operational efficiency, service quality, and network reliability

- Do you have solid experience with IP/MPLS, IP Datacenter networks, routing and switching, SD-WAN technologies (e.g. Fortinet, Versa), as well as network planning and automation?
- Are you experienced with network automation, simulation, monitoring, and troubleshooting tools, as well as database technologies?
- Are you an analytical, proactive, and resilient team player who enjoys solving complex technical challenges?
- Are you willing to take technical ownership and provide engineering leadership in complex technical initiatives?

At Magenta, we believe in diverse employees and live equal opportunities. We welcome all applications regardless of cultural and social background, age, gender, nationality, religion, disability or sexual orientation. Magenta connects all people.

I ♥ Magenta

That sounds good to you?
