

Solution Architect (f/m/d) - B2C Portfolio- & Go-To-Market Tribe

Vienna | asap | full-time | unlimited

We are Magenta

Magenta Telekom is a leading provider of internet, mobile communications, entertainment and business solutions in Austria. The company counts around 2,200 employees and is part of the Deutsche Telekom Group.

Your Team

We’re committed to delivering top-tier service and seamless customer experiences. To support that goal, we’re looking for a skilled, hands-on Solutions Architect to help evolve and optimize our IT architecture.

You’ll identify technical challenges and design practical, scalable solutions. Working closely with business stakeholders, you’ll clarify goals, refine requirements, and turn business needs into effective technical solutions. Your expertise will shape architectural decisions and contribute directly to successful cloud implementations and software development.

This is a strategic role with room to stay close to the code. You’ll have the freedom to prototype new approaches, explore practical uses of AI, and influence our technical direction.

- **Design and evolve architectures:** Shape scalable, secure, high-performing architectures that align with business goals and modern engineering practices.
- **Engage with the business:** Work with stakeholders and product owners to understand business goals, refine requirements, surface trade-offs, and keep proposed solutions focused on real needs.
- **Collaborate deeply:** Partner with engineers and other teams to turn refined requirements into pragmatic, maintainable solutions.
- **Prototype and propose:** Explore end-to-end solutions, **including appropriate uses of AI,** with an eye toward long-term scalability and sustainability.

- **Contribute hands-on:** Develop, review, and maintain high-quality code for critical projects while guiding teams toward good engineering practices.
- **Share knowledge:** Mentor team members, document technical decisions, and help teams stay aligned.
- **Champion Agile and DevOps:** Support modern delivery practices that improve speed, quality, and collaboration.
- **Keep learning:** Stay curious about emerging technologies, including AI engineering, and experiment with tools that can meaningfully improve our technology and customer experience.

- Do you have 7+ years of experience in software engineering and/or software architecture? Are you already working as an architect, or are you a senior engineer ready to step into the role with mentoring and support?
- Are you experienced in designing and implementing cloud-native applications? Do you have strong experience with Agile delivery and collaborative ways of working?
- Are you able to engage business stakeholders, ask the right questions, and translate business needs into clear requirements and technical direction?
- Are you curious about AI and its practical applications in software and business solutions, and are you keen to explore how AI can add value, even if you are not an AI specialist?
- Do you have strong communication skills and the confidence to help guide change across the organization?

At Magenta, we believe in diverse employees and live equal opportunities. We welcome all applications regardless of cultural and social background, age, gender, nationality, religion, disability or sexual orientation. Magenta connects all people.

I ♥ Magenta

That sounds good to you?
THEN WE MIGHT BE THE RIGHT ONES FOR YOU.

- Employee assistance services
- Food voucher
- Flexible working hours
- Job ticket
- Learning offers
